SOVIET JOURNAL OF COMPUTER AND SYSTEMS SCIENCES

(formerly Engineering Cybernetics)

CONTENTS FOR 1986

Number 1

	English Page	Russian Page
V.M. Lokhin, R.Yu. Madygulov, and M.P. Romanov: Investigation of Motions in Pulse Frequency Systems	1	194
S.A. Grishin: Lyapunov's Methods in the Inverse Problems of Dynamics	9	202
B.K. Poplavskiy and G.N. Sirotkin: Estimation of the Parameters of Dynamical Systems in the Course of On-Line Experiment	15	208
V.A. Gelovani, Yu.F. Pronozin, and V.I. Rabover: A Problem of Aggregation of Dynamical Systems	22	215
Kh.K. Brutyan and L.V. Mkrtchyan: An Integration Method for Data Bases	27	29
O.S. Molokova: The Formation of an Individual Explanation in Expert Systems	34	103
I.B. Zadykhaylo and S.D. Zelenetskiy: Synchronization Mechanisms in Parallel Programming Languages (A Survey)	45	129
Ye.K. Gordiyenko and V.N. Zakharov: Process Management in Knowledge Bases	81	175
A.V. Spesivtsev: The Error of Certain Approximate List Scheduling Algorithms	96	22
L.D. Akulenko, N.N. Bolotnik, and A.A. Kaplunov: Certain Control Regimes of Industrial Manipulators	102	44
A.A. Eres'ko: The Direct and Inverse Kinematic Problems for Manipulators with Nonholonomic Contraints	109	51
N.Yu. Golikov, V.I. Kavinov, and A.E. Klepov: Parameter Identification Algorithms of Kinematic Schemes of Robots	117	59
E.V. Suvorov and Ya.I. Fet: Database Processors	120	63
A.G. Chefranov: On Effectiveness of a Class of Algorithms of Operational Loading of Asynchronous Multiprocessor Systems	131	76
A.T. Barabanov: Optimal with Respect to a Quadratic Criterion Control of a Linear Object with a Constant Delay	134	180
BRIEF COMMUNICATIONS		
S.I. Zhegalov: A Method of Calculating the Probability of Failure-Free Operation of a System with Different Elements	147	219
I.P. Tsaregradskiy: Duplication of Servicing of Orders	149	221
N.A. Dolinin: Efficient Reduction of the Procedure for Detecting Fluctuating Signals in an Automaton with a Linear Tactic	152	223
M.I. Gil': Necessary and Sufficient Conditions for Stability of Linear Nonstationary Systems	155	225
A.M. Rodionov: Stability of Controlled Systems of Variable Structure with a Lag	160	229

Number 2

S.K. Dulin: Analysis of the Structure of Mismatched Sets	1	18

A.A. Eres'ko: The Direct and Inverse Kinematic Problems for Manipulators with Nonholonomic Contraints	109	51
N.Yu. Golikov, V.I. Kavinov, and A.E. Klepov: Parameter Identification Algorithms of Kinematic Schemes of Robots	117	59
E.V. Suvorov and Ya.I. Fet: Database Processors	120	63
A.G. Chefranov: On Effectiveness of a Class of Algorithms of Operational Loading of Asynchronous Multiprocessor Systems	131	76
A.T. Barabanov: Optimal with Respect to a Quadratic Criterion Control of a Linear Object with a Constant Delay	134	180
BRIEF COMMUNICATIONS		
S.I. Zhegalov: A Method of Calculating the Probability of Failure-Free Operation of a System with Different Elements	147	219
I.P. Tsaregradskiy: Duplication of Servicing of Orders	149	221
N.A. Dolinin: Efficient Reduction of the Procedure for Detecting Fluctuating Signals in an Automaton with a Linear Tactic	152	223
M.I. Gil': Necessary and Sufficient Conditions for Stability of Linear Nonstationary Systems	155	225
A.M. Rodionov: Stability of Controlled Systems of Variable Structure with a Lag	160	229

Number 2

S.K. Dulin: Analysis of the Structure of Mismatched Sets	1	18

	English Page	Russian Page
B.R. Amangel'diyev: Absolute and Relative Optimality of Solutions of Multicriterial Problems	10	3
M.G. Klepikova: Regularization of a Method for Constructing a Set of Efficient Solutions in a Linear Multicriterial Problem	15	9
N.S. Vasil'yev: A Model of a Communication Network Development	20	15
O.P. Vinogradov: A Multiphase System with Identical Service	28	29
Kh.B. Kordonskiy and V.L. Rastrigin: Random Censoring on Phase Space Trajectories	32	33
V.P. Savchuk: Approximate Bayesian Estimation of the Probability of Failure-Free Operation for a Class of Aging Distributions	37	38
N.A. Starodubtsev: Asynchronous Processes and Antitonic Controlling Circuits. III. Realization	44	83
S.V. Yemel'yanov, V.B. Gavrilov and A.A. Solov'yev: A Discrete Differentiation Algorithm on the Basis of a Binary Structure	52	93
A.P. Parkhutik and V.I. Tsurkov: Hierarchical Problems of Control of Distributed-Parameter Objects	60	102
A.P. Krishchenko: Stabilization of Program Motions of Nonlinear Systems	65	108
A.I. Kibzun and V.V. Malyshev: Optimal Control of a Discrete-Time Stochastic System	69	113
P.D. Krut'ko: Algorithmic Procedures for Solving Inverse Problems of Controlled System Dynamics	77	121
V.A. Podchukayev: Analysis of the Crudeness of the Asymptotic Stability Property of Controlled Systems	87	131
F.A. Aliyev: An Optimization Problem with Two-Point Boundary Conditions	93	138
V.N. Kharisov: Nonlinear Filtering for a Multimodal *a posteriori* Distribution	102	147
L.V. Labunets, M.P. Mus'yakov and A.D. Reshetko: A Model of Control System Inputs in the Form of a Homogeneous Isotropic Random Field	112	156
V.A. Leonov: Structural-Parametric Identification of Dynamic Systems Described by Stochastic Difference Equations	122	166
A.A. Natan and A.I. Samylovskiy: Recognition of Gaussian Random Processes by Local Analysis of Their Properties	128	172
BRIEF COMMUNICATIONS		
M.V. Fomina: Methods for Successive Construction of a Hierarchical Representation of the States of a Complex Object	136	193
L.B. Groysberg: Planning of Component Tests for Confirmation of System Reliability	146	202
A.V. Golovko: Recursive Axioms in Deductive Data Bases	154	230
S.O. Varosyan: A Model for Completion of the Description of a Spatial Situation Description	159	233

Number 3

V.N. Vagin and N.P. Viktorova: Generalization Problems in Decision Support Systems, Generating Entity Classes and Selection Relationships in Semantic Networks	1	3
A.Ya. Dikovskiy and M.I. Kanovich: Computational Models with Decomposable Subproblems	14	36
Ye.I. Yefimov: Calculation of Probability in Fuzzy Human Inference	34	60
A.P. Guminskiy and V.V. Martynov: Construction and Implementation of a Scheduling Algorithm in a Calculus Based on Universal Semantic Code	48	76
D.A. Pospelov and I.Ya. Sil'dmyae: Role Structures in the Representation of Knowledge and in Interactive Systems	53	83
Ye.S. Kuzin: The Intelligent Interface. Fundamental Organization Principles and Implementation Problems	59	90
R.Kh. Zaripov: A Conversational Mode in Music Using an Intervalistic-Metric Intonation Structure	69	115
G.B. Rubal'skiy: Discrete-Supply Strategy in Stock Control Models	82	37
N.A. Anisimov and V.L. Perchuk: Representation of Exchange Protocols and Petri Using Finite Sequential Machines Nets	90	74

	English Page	Russian Page
V.I. Levin: Dynamic Processes in Automata with Periodic Inputs. II. General Inputs	96	81
G. Agre, Khr. Dichev, D. Dochev and Z. Markov: Implementation of Prolog on Personal Computers	108	94
R.A. Aliyev and A.E. Tserkovnyy: An Intelligent Robot for Quality Estimation and Sorting of Components for Automated Quality Control	113	100
B.V. Aksel'rod, V.G. Gratskiy, V.P. Fedorov and V.I. Filippovich: An Algorithm for Indirectly Measuring Forces Acting on a Robot	120	107
A.Kh. Giorgadze and P.V. Manzhgaladze: A Homogeneous Structure Stable Under Malfunctions	125	172
P.V. Denisovich: Linear Cell Algorithms for Finding Transitive Closures and Shortest Distances in Graphs	132	180
V.I. Levin: Automatic Models and Methods of Investigating Regular Queueing Systems	137	186
BRIEF COMMUNICATIONS		
V.I. Gorodetskiy, V.V. Drozhzhin and R.M. Yusupov: Multilevel Attribute Grammars for Modeling Complex Structurally Dynamic Systems	147	165
A.G. Kevkhishvili: Conceptual Modeling of Systems of Moving Objects	152	169
N.O. Vil'chevskiy and E.Yu. Kolomiiets: Determination of the Level of Insurance Stock in Case of a Random Character of Discrete Processes of Delivery and Consumption	155	172

Number 4

The Forthcoming Twenty-Fourth Convention of the Communist Party of the Soviet Union	1	3
V.A. Irikov, V.Ya. Larin, and L.M. Samushchenko: Algorithms and Programs for Solving Applied Multicriterial Problems	2	5
M.N. Merenzon: A Dynamic Programming Algorithm for Optimal Scheduling of a Nonhomogeneous Multiprocessor System	13	17
S.S. Veniaminov: The Effectiveness of the Hybrid Method for Solving Discrete Optimization Problems	17	21
N.S. Vasil'yev: Approximation of Convex Sets by Polyhedra and Its Application to the Search for a Global Extremum	24	27
T.P. Sonkina and O.I. Teskin: Interval Estimation of the Gamma Percent Resource of a System by the Results of Tests of Its Components	34	46
R.S. Sudakov: Interval Estimation of Monotonic Functions by Test Results	43	55
V.P. Savchuk: Bayesian Estimation of the Reliability of a Technological Device on the Basis of an Errored Reliability Model	49	60
V.F. Golikov: The Effect of the Accuracy by Which Reliability Characteristics are Determined on the Choice of the Preventive Maintenance Period	55	66
V.A. Kaustov, Ye.I. Litvak, and I.A. Ushakov: The Computational Effectiveness of Reliability Estimates by the Method of Nonedge-Intersecting Chains and Cuts	59	70
S.V. Emel'janov, S.K. Korovin and L.V. Levantovskii: Second Order Sliding Modes in Controlling Uncertain Systems	63	112
S.A. Grishin: Optimal Stabilization of Nonlinear Dynamic Systems	69	119
P.D. Krut'ko: Polynomial Equations and Inverse Problems of Controlled System Dynamics	75	125
L.M. Skvortsov: Realization of the Transfer Matrix of a Dynamic System in the Form of State Equations	83	134
V.I. Ivanov and V.I. Tikhonov: The Unification of Two Measuring Devices	88	139
N.I. Baklashov, M.V. Gal'chenko, and V.A. Gurevich: Determination of the Statistical Characteristics of Systems by Modeling Results	94	146
L.N. Volgin: Synthesis of a Discrete Tracking System That is Optical with Respect to a Combined Criterion	104	155

	English Page	Russian Page
BRIEF COMMUNICATIONS		
O.G. Grigor'yev: A Communication System for a Narrowly Restricted Subject Area	112	162
N.L. Polyayev: Nonstationary Characteristics of a Single Channel System with a Constraint on the Waiting Time	116	174
O. Sakhobov: Two-Sided Inequalities for the Distribution of Working Time before Failure	122	179
G.I. Falin: On Heavily Loaded Systems with Repeated Calls	124	180
A.D. Solov'ev and S.A. Solov'ev: Queueing Systems with a Limited Time in the System	129	184
G.N. Povarov: On Comparing Singular Boolean Functions	134	188
B.S. Karabekov: Application of Conceptual Languages to the Problem of Planning Computations in a Computer Network	138	191
A.M. Zabolotnyy and V.M. Pliner: Discrete Representations in Metric Scaling Problems	145	197
N.A. Lakota, E.V. Rakhmanov, A.N. Strelkov and V.N. Shvedov: Modeling of an Elastic Manipulator on Moving Base	150	201
S.G. Volchenkov: A Graph-Theoretic Problem Connected with Intersection of Circumference Chords	155	204
B.Ye. Safarov: Determination of the Duration of the Period Until the Occurrence of the First Shortage of Spare Parts	160	208
A.V. Fedorov: A System with a Bounded Queue and with Service Time Which Depends on the Number of Waiting Demands	164	211
A.V. Shakhin: The Asymptotic Behavior of the Higher Moments of Semi-Markov Point Processes	167	213
V.V. Araksyan: An Algorithm for Decomposing a Probability Graph of Dialog Procedures	172	209

Number 5

A.K. Aylamzyan and M.M. Gilula: The Concept of an Information Machine	1	4
A.V. Zhozhikashvili and V.L. Stefanyuk: The Category Theory in Problems of Knowledge Representation and Learning	11	17
V.A. Gelovani, D.I. Bezrukov, V.B. Britkov, A.O. Golosov, and M.Sh. Tsalenko: Interactive Development of Information Systems	24	48
Ye.K. Gordiyenko: Implementation of Search Functions of the FRL Language Using a Two-Tag Associative Memory	43	71
V.A. Davidovich and L.I. Mikulich: Principles of Realization of Language Processors for Interactive Systems	59	110
V.V. Baydun and Z.B. Rakhmanova: Expert Medical Diagnostic System	67	119
M.S. Gamze and A.N. Yefimov: Prediction of a Basis Set of Optimal Solutions of LInear Prediction Problems	76	3
N.S. Gubonin: Analytical Solution for a Class of Geometrical Programming Problems of a Nonzero Degree of Difficulty	81	8
S.S. Lebedev and I.T. Medvedovskaya: A Generalized Method of Marks for a Problem of Integer Linear Programming	90	16
L.I. Feygin: Estimation of the Value of the Planning Horizon in the Case of Fuzzy Durations of the Operations	97	23
I.A. Ageyev and V.V. Voloshinov: A Method for Constructing Pareto Sets in Hierarchical Structures	102	41
Yu.M. Baryshnikov: The Distribution of the Number of Nondominating Variants	107	47
V.A. Vyazgin and V.V. Fedorov: The Reduction of Problems of Planning Technological Systems	112	51
I.A. Ushakov: A Universal Generating Function	118	97
A.A. Zamyatin: Statistical Inference about Reliability of a Renewable System with Multiple Failures	130	109
A.V. Makarichev: A Two-Phase System with Identical Service in the Case of Different Service Disciplines and Heavy Load	136	115

	English Page	Russian Page
Ye.V. Morozov: Regeneration and the Criterion for Stationarity of Multichannel Queues Connected in Tandem	140	119
O.K. Zakusilo: A Queueing System with Periodic Input Stream	145	124
Yu.R. Kotta: Derivation of the Inverse System for Discrete Nonlinear Systems	152	158
BRIEF COMMUNICATIONS		
V.V. Kurilkin, V.F. Panov, and I.B. Fedorov: Estimation of the Number of Partial Random Streams from Characteristics of an Overall Streak with an Unknown Domain of Definition	157	176
A.A. Svetlakov: Multistep Algorithm of Adaptive Estimation of Models of Linear Statistical Objects	164	188

Number 6

S.M. Yefimova and Ye.V. Suvorov: A Π-Graph Model for Representing Knowledge and a Method for Its Hardware Realization on the Basis of the Labelled Arrays Method	1	32
V.B. Borshchev: Logic Programming	15	89
V.Ye. Zhukovin: Fuzzy Multicriterial Decision-Making Problems	33	129
Ye.P. Balashov, M.S. Kupriyanov, and L.G. Loginskaya: Construction and Interpretation of Fuzzy Algorithms	38	134
Kh.I. Tani: Interfaces for Intelligent Computing Systems	44	140
B.S. Tsirlin: A Survey of Equivalent Problems of Realizing Circuits in the AND-NOT Basis That Are Speed-Independent	58	159
G.N. Konstantinov and G.V. Sidorenko: External Estimates for the Attainability Sets of Controlled Systems	70	28
L.L. Vyshinsky, Yu.D. Pribytkov, V.I. Shilenko, and N.I. Shirokov: The FAKIR Tool System. I	77	35
A.S. Nemirovskiy and I.A. Teslya: Optimizing the Selection of Load Resistors in Gate-Array Chips	82	56
L.M. Luk'yanova: A Goal Structuring Method (Using the Example of Goal Structures for Goal Programs)	91	66
A.A. Dmitriyev and S.L. Zenkevich: Logic Control of an Adaptive Robotic System	100	76
V.V. Avetisyan, L.D. Akulenko, and N.N. Bolotnik: Modeling and Optimization of Transport Motion for an Industrial Robot	107	84
E.A. Kotov: Investigation of Multifrequency Oscillations in Nonlinear Control Systems of Manipulators	115	91
P.D. Krut'ko: Construction of Algorithms for Controlling Nonlinear Objects on the Basis of the Concepts of the Inverse Problems of Dynamics. Systems with a Single Degree of Freedom	120	130
B.M. Shamrikov: Comparative Analysis of the Accuracy of Parametric Identification of Dynamic Objects in Open- and Closed-Loop Automatic Control Systems	133	143
N.V. Nikitin: Statistical Analysis of Nonlinear Control Systems on the Basis of Continual Integrals	139	150
BRIEF COMMUNICATIONS		
V.S. Neyman: Organization of Fast Search in a Set of Terms	147	196
G.S. Levitin: Organization of Computations That Enables One to Use Stack Memory Optimally	151	199
G.G. Ananiashvili, N.N. Bichinashvili, Z.I. Mundzhishvili, and T.L. Khomeriki: A Method for Identifying Natural Language Words in Dialogue Systems	160	205
